I move your shop to Shopify.

And hand it back ready to run with Claude and ChatGPT.

For shops on WooCommerce, PrestaShop or Magento. Today you pay for hosting, maintenance and licences, and chase whoever fixes the site. On Shopify you don't.

What I take off your plate

- Updates, plugins, hosting and patches: Shopify handles them.
- A secure checkout, PCI DSS Level 1 compliance included.
- You run the shop by talking to Claude or ChatGPT.

What I build

- Your Shopify store, with a theme on your brand.
- Products, customers, orders and content migrated from the old shop.
- 301 redirects on every page, so you keep your Google rankings.
- Your old shop stays online until the new one is ready.

Three packages

Excluding VAT. Fixed price after the free audit.

	Essential from €3,000	Pro from €6,500	Custom from €10,000
Catalogue	up to 500 products	up to 2,000 products	no limit
Languages	1	up to 2	as many as needed
Integrations	up to 5	up to 10	as many as needed
Theme	Shopify, configured	premium, on your brand	custom design and features
AI assistant	3 skills: products and prices, orders, discounts	5 skills: plus SEO copy and customer replies	custom automations
Timeline	3-4 weeks	6-8 weeks	after the audit

Always included	Products, customers and orders migrated, 301 redirects, one hour of training, 30 days of support.
Optional	Care plan from €400/month after the 30 days: monitoring, updates, small changes.

An example: Convivium

A food shop on Shopify with recipes, producer pages and boxes, built to measure.

They wanted a custom SaaS: together we saw Shopify could do all of it, for less. convivium.cloud ↗

Book your free audit.

Know what moves and what it costs.

Current risks, what moves, package and fixed price.
No commitment.

Giovanni Di Meo, Shopify developer.
